

3D Stitching and Visualization

AIM: Stitch large tiles of different imaging techniques (2P, Lightsheet, Confocal, Spinning Disk)

Input: Limb of axolotl imaged with Andor Dragonfly Spinning Disk

Description: Large 3D Objects are acquired in tiles and have to be stitched later. Imaris Stitcher is easy to use and shows good stitching result. Final Images can be directly visualized in Imaris.

Output: Imaris file

Single Tiles
