

*„Unless you understand imaging you risk imagination“*

Mark B. Cannell

Dear future user of confocal microscopes

You can find the schedule of the mandatory theory introductions to confocal microscopy on the Homepage at Courses & Events . No previous knowledge is required.

**Every first Wednesday of a month we meet in the room E-016 IMP at 1PM.**

The meeting takes around 4 hours and covers the basics of microscopy with a focus on fluorescence and confocal microscopy.

The common theory sessions are followed by 2 individual hands-on practical sessions at a microscope, each time 3 hours.

If you want to take part in the introduction, please send an email to [microscopy@imp.ac.at](mailto:microscopy@imp.ac.at) stating which date you prefer.
