# Accessing BioOptics' Workstations via VNC

VNC connections allow for use of software, which may be non-functional through regular remote connection

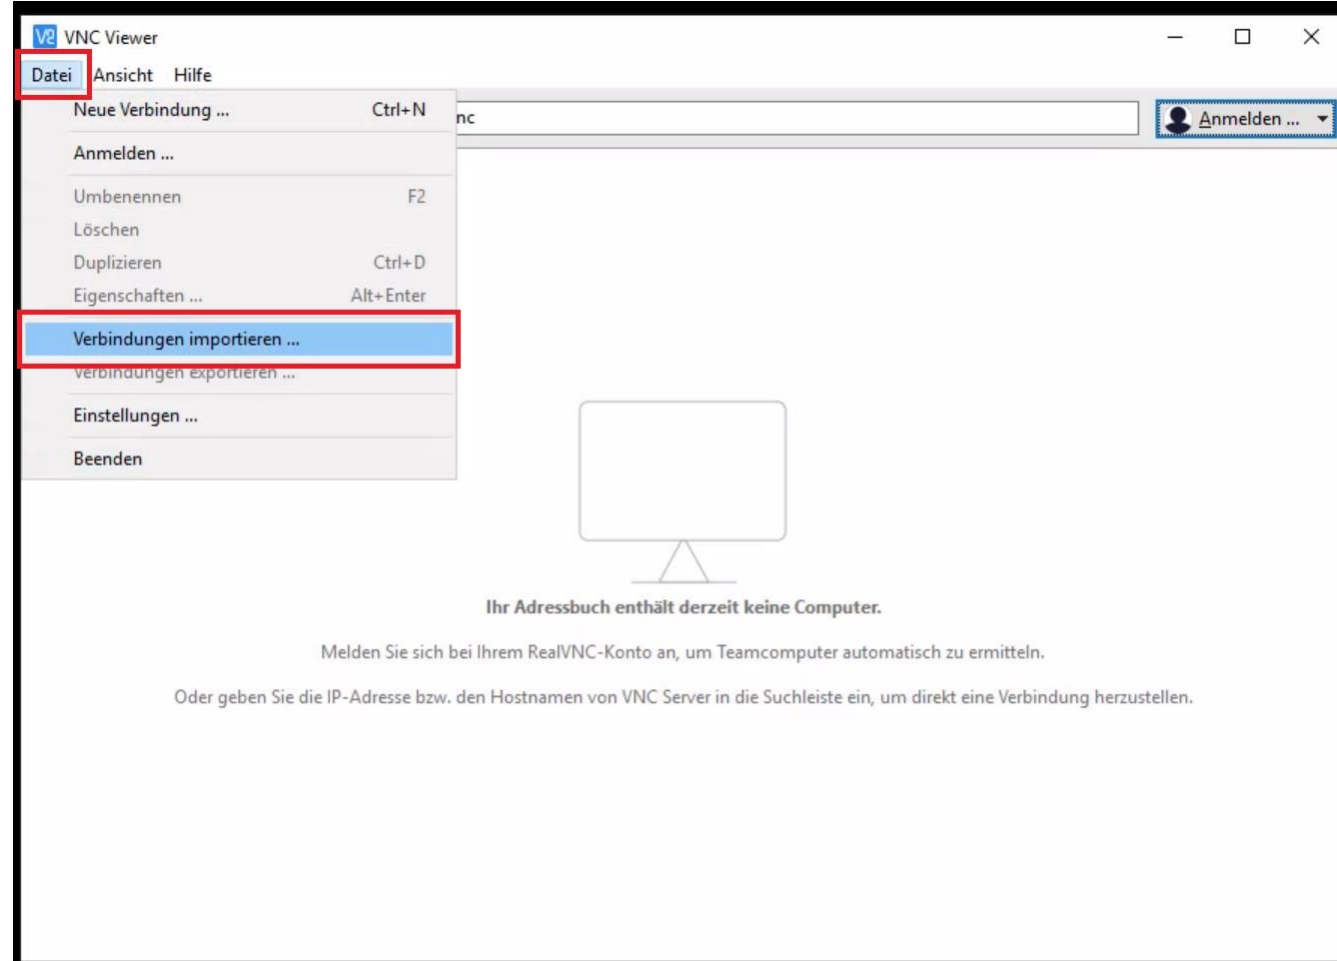

Connecting

- Launch a web-browser connecting to <https://remoteapps.vbc.ac.at/RDWeb/webclient/>
- Enter your VN2 logon credentials

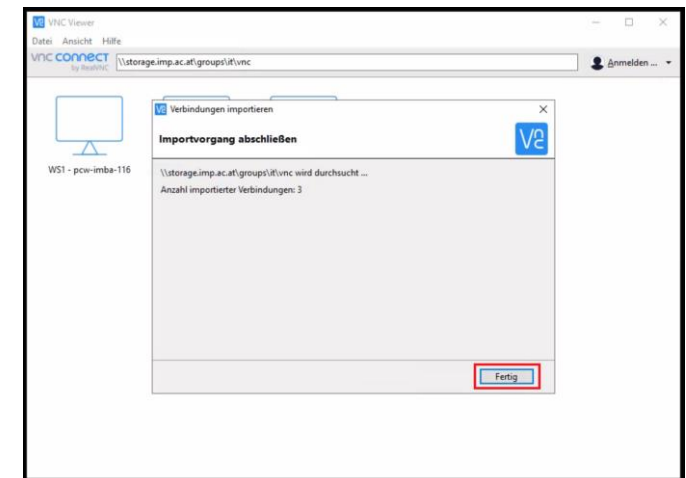

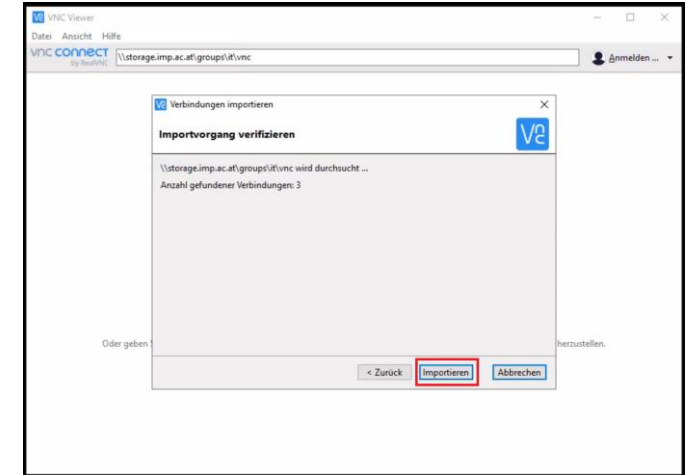

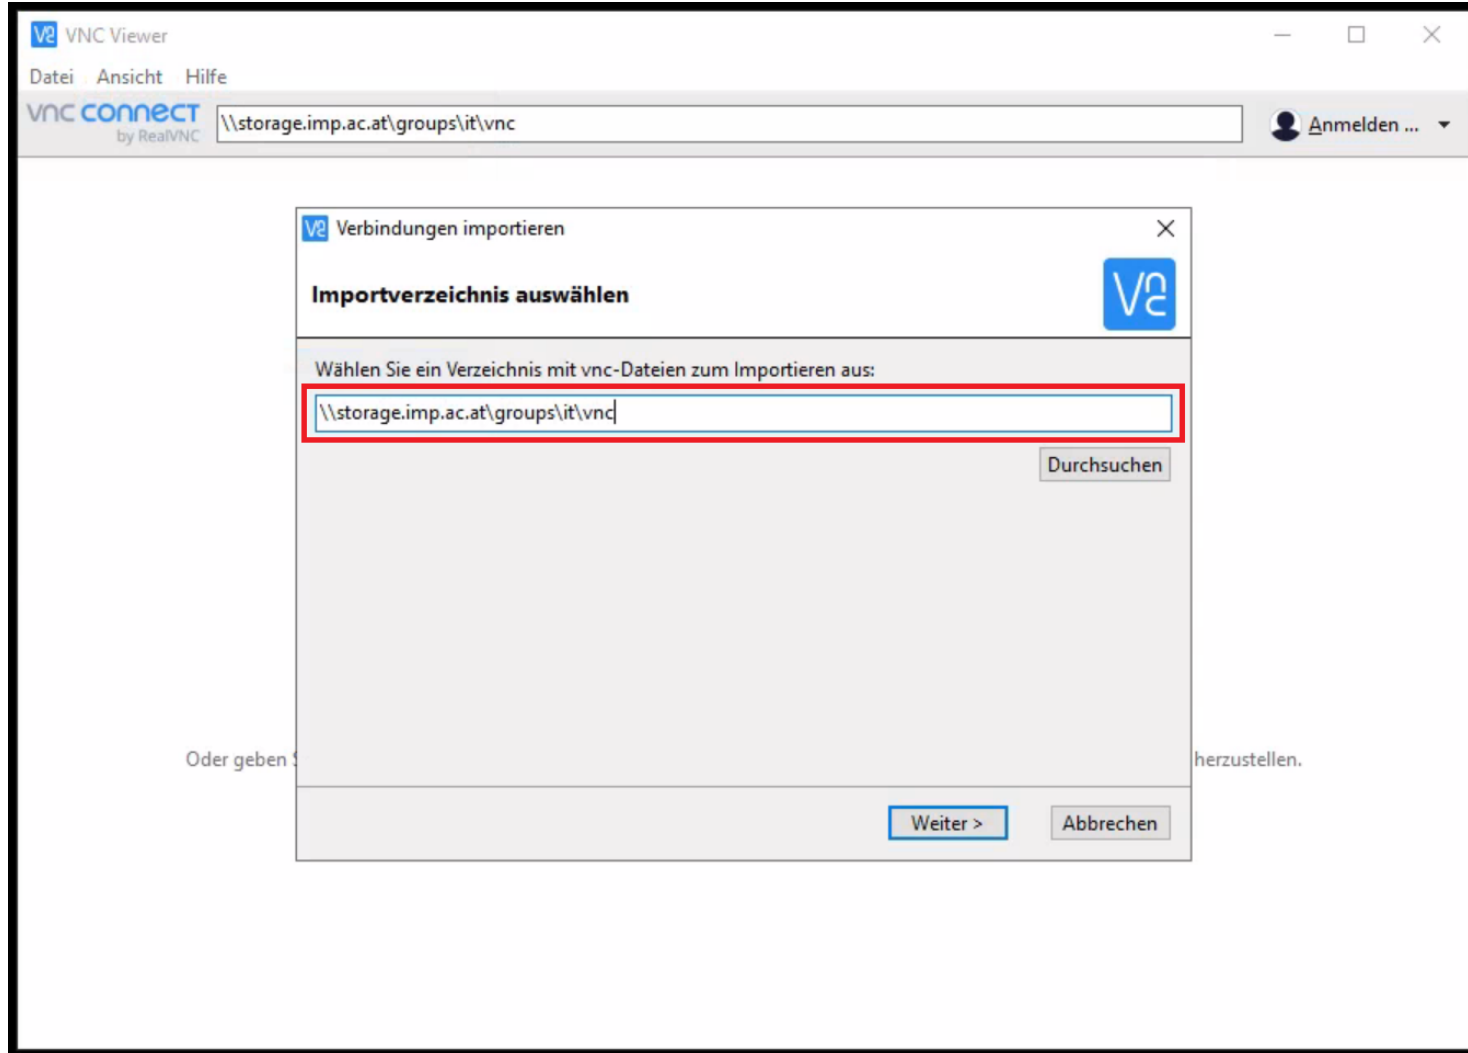

- Click the VNC Viewer icon to start the application

- After the connection process is through, you will see the following window

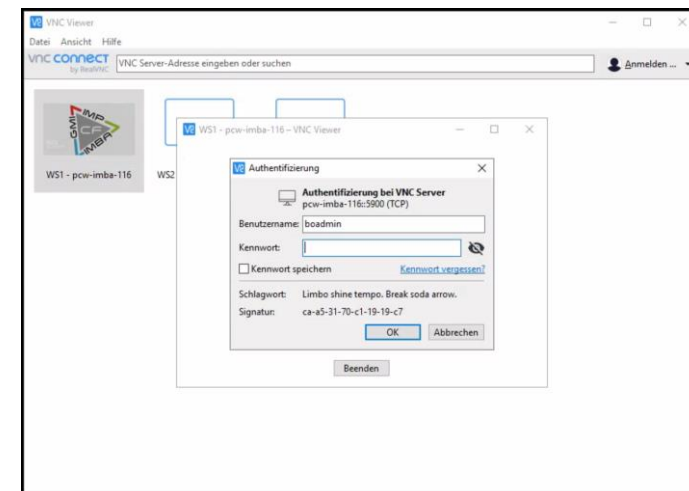

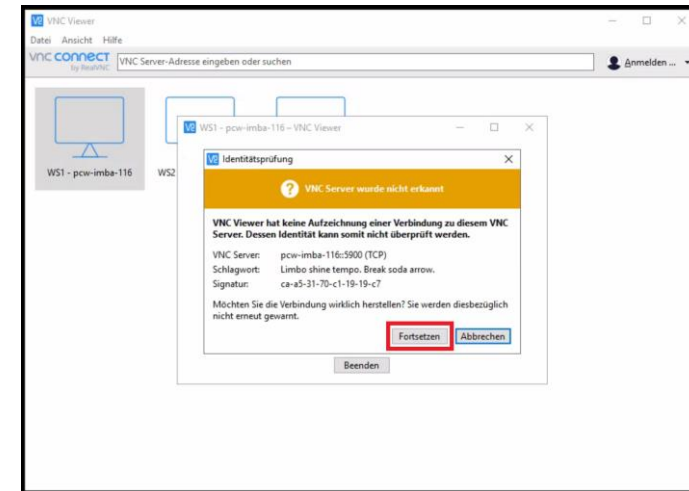

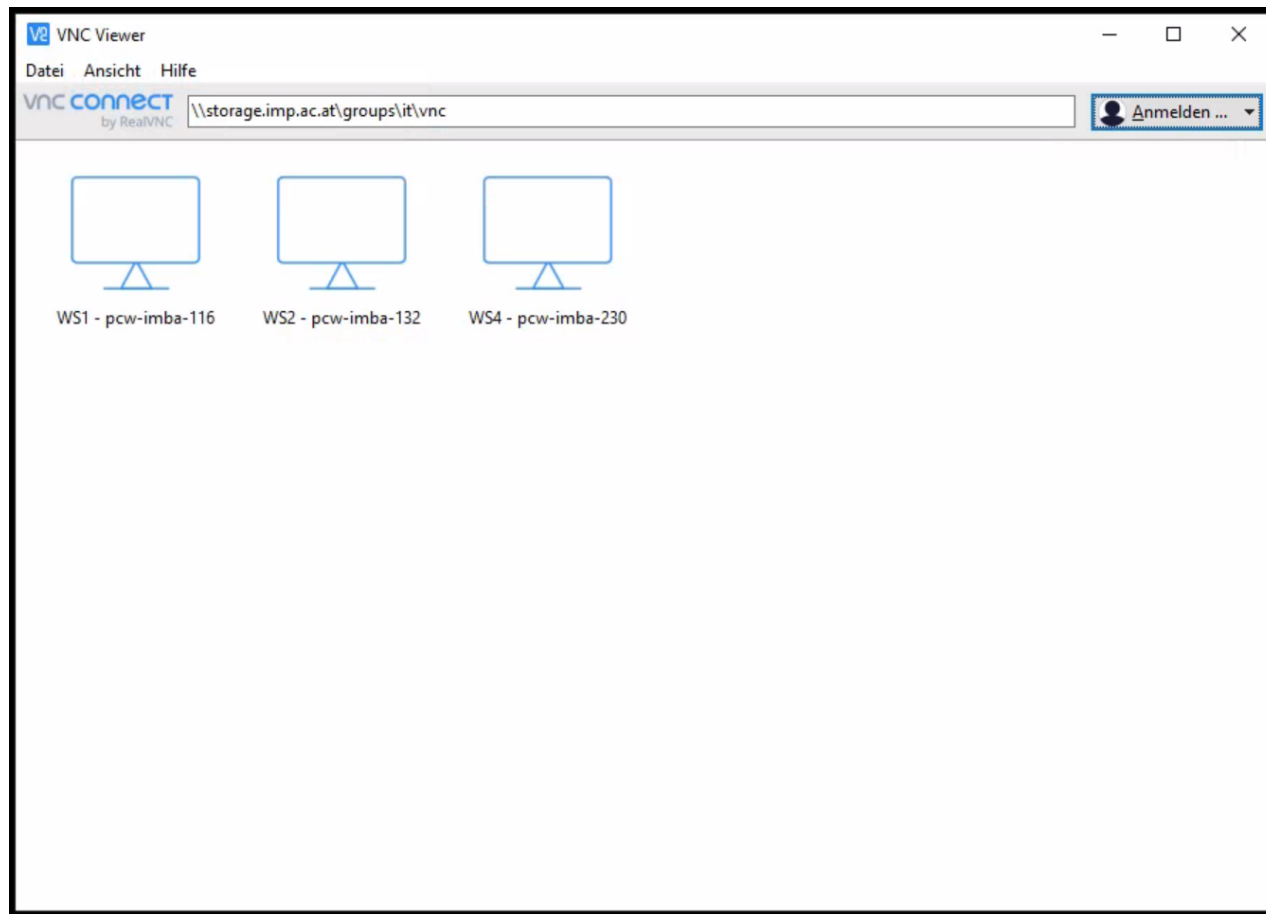

- Click ‚Datei‘ (file) and ‚Verbindungen importieren‘ (import connections)

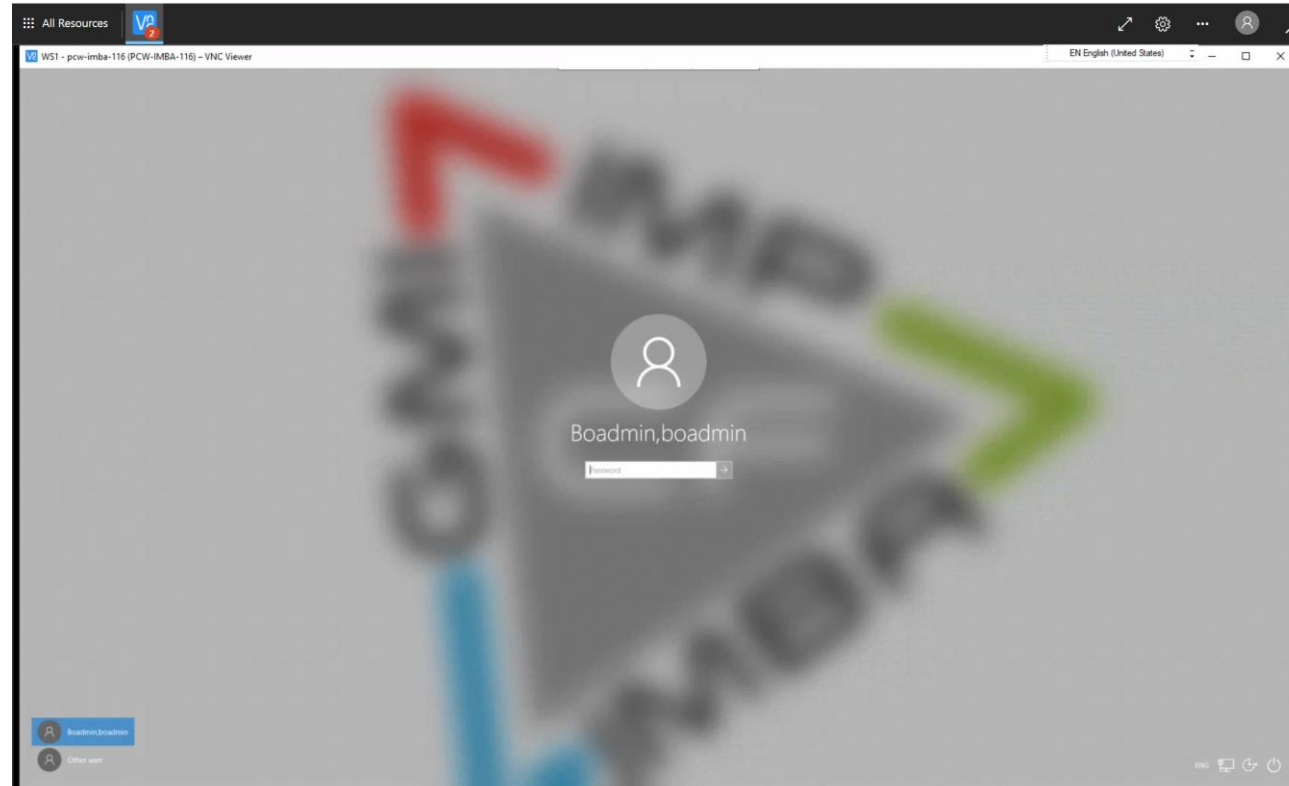

- Enter <vnc://storage.imp.ac.at/groups/it/vnc> in the line and click through the following screens

- The workstations available through VNC connection will now be shown.
- Select the appropriate workstation and confirm the connection
- Enter your VN2 logon credentials

- Enter your VN2 logon credentials one more time to have access to the workstation you selected.

Disconnecting

- After the regular logout from the workstation, the VNC connection still needs to be severed.
- In order to get the appropriate menu bar to drop down, please mouse over the thin region top center of the screen
- Click ‚Sitzung Beenden‘ (End session)

You are all done
